

For our Client - global product leader in IT hardware solutions - we are looking for candidates for the post of:

Quality Assurance Testers - Contractor Warszawa

As a tester, you will support quality assurance and testing efforts for an international professional services firm. Your responsibilities will include analysis and review of requirements and design documents to define test strategies. You will develop and execute comprehensive test plans and test cases to identify, troubleshoot and isolate design needs. You will work closely with the development, business and customer teams to resolve software defects and report about test progress and problem status.

The ideal candidate will have:

- University degree and minimum 2 years of experience
- Knowledge of relational database (SQL) and UNIX
- Functional knowledge of telecom business practices
- Analytical, logical and highly detail-oriented way of working
- Strong troubleshooting and problem isolation skills
- Experience with automated testing tools is a plus
- Excellent English skills
- Strong communication and documenting skills
- A great deal of initiative and team orientation
